# Introducing the Respro® Pollen Mask

Developed with the hypersensitive individual in mind.

## Key benefits

- » **SUB-MICRON PERFORMANCE**
- » **ULTRA LIGHTWEIGHT**
- » **FOUR SIZES**
- » **HYPO-ALLERGENIC**
- » **REPLACEABLE FILTER**
- » **LATEX FREE**
- » **HOOK/LOOP FIXING**

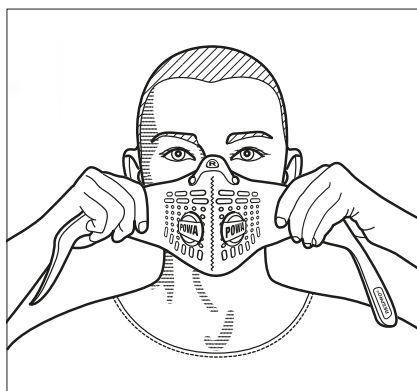

Particle sensitivity can be completely debilitating, the particles that induce these conditions are not rare but found in everyday items in everyday environments and can have a serious effect on the well-being of an individual.

Pollen, cigarette smoke, animal dander, dust mites, moulds and spores...

## Take control of allergy symptoms

The Respro® Pollen Mask screens out non-toxic, sub micron particulates and other pollution by-products together with natural allergens found in the environment especially during the months between early March and late October.

Itchy eyes, congestion, fatigue, sneezing, coughing, nasal drip, inflammation, Hives due to the effects of pollen, animal dander and airborne allergens.

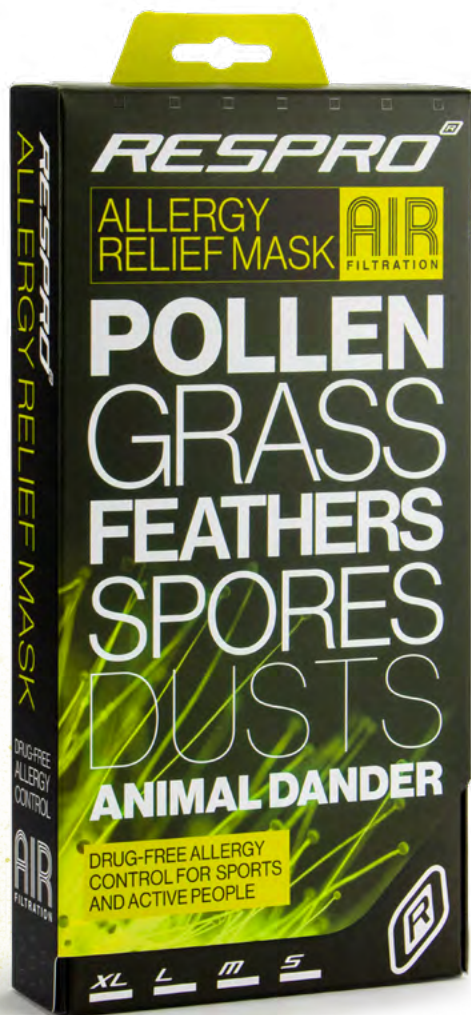

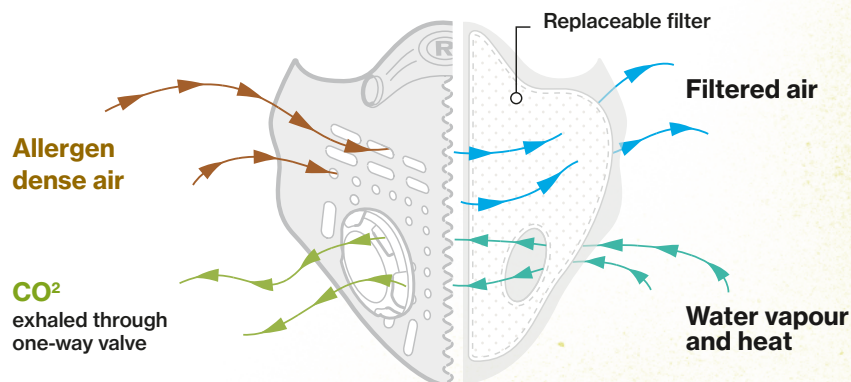

Respro® masks have an adjustable hook and loop fastening for optimum fit and comfort. The formable nose clip can be gently shaped to form an effective seal.

## Independently assured

This Respro® mask has received an 'Allergy Friendly Product' award from the British Allergy Foundation.

### Breathe easy

All the materials used in this mask are known to be inert and unlikely to cause an allergic reaction. The mask material is ultra lightweight and air-permeable allowing the face to breathe easily and is made from Polyester.

The Techno™ valves are made from Polypropylene with medical grade Silicone rubber diaphragms.

The Hepa-Type™ filter is made from Polypropylene and filters out fine respirable sub-micron dusts (less than 1 micron in size).

PET YOUR CAT / BOND WITH YOUR DRAGON
